Please obtain further information about the angled screwdriver from the QR codes

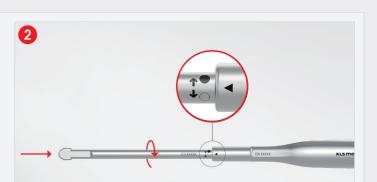

Video

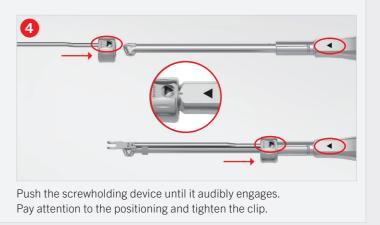

Note: This is a quick guide to help users who are already familiar with the system. It therefore does not contain all the details. The information contained in this QuickGuide is intended to demonstrate the KLS Martin Group products. For a complete list of indications, contraindications, warnings, precautions and sterilization information, please refer to the instructions for use article no. 90-601-58-10. Always read the instructions for use before using any KLS Martin Group product. Users must always rely on their own clinical judgment when deciding which products and techniques to use on their patients.

Insert the head into the sheath until it engages. Pay attention to the symbols and turn from \bigcirc to \bigcirc until it locks.

For safe storage, we recommend the wire basket (REF 50-990-40-04) and the small storage for accessories (REF 50-990-41-04).
